

## To presenters at the ICLP 2018 Oral Sessions

### ORAL SESSION GUIDELINES

There will be time of 17,5 minutes dedicated to each paper including introduction of the speaker by session chair, paper presentation and discussion. Therefore, presentations shall be planned to last no more than 15 minutes to have time for the short discussion.

There is no PPT or PPTX template which presenters shall use. Usual good practice on amount and size of presented text should be followed to communicate clearly main outcomes even if some details have to be left out.

We wish to remind authors that the ICLP Paper shall not be misused as advertisement for the companies or products. Authors' affiliation logos can be used, but should not be conspicuous.

Presenters shall also prepare a short biography for the session chair to be read out.

Presenters are kindly requested to be in the room for which their presentation has been scheduled at least 20 minutes before the start of the session. Presenters shall bring their presentation file to the session room ready to be uploaded onto the local PC, and hand out their short biography to the session chair.

The ICLP Scientific Committee is grateful for your contribution to the success of 2018 ICLP Oral Sessions. The Oral Session Chairs will report on outstanding papers that shall be considered for the ICLP associated events: the Young Scientist Award and the EPSR - Special Issue on Lightning Protection.
